

# Noah System Electronics GmbH

DEVELOPMENT AND PRODUCTION OF POWER ELECTRONICS

## BUSES

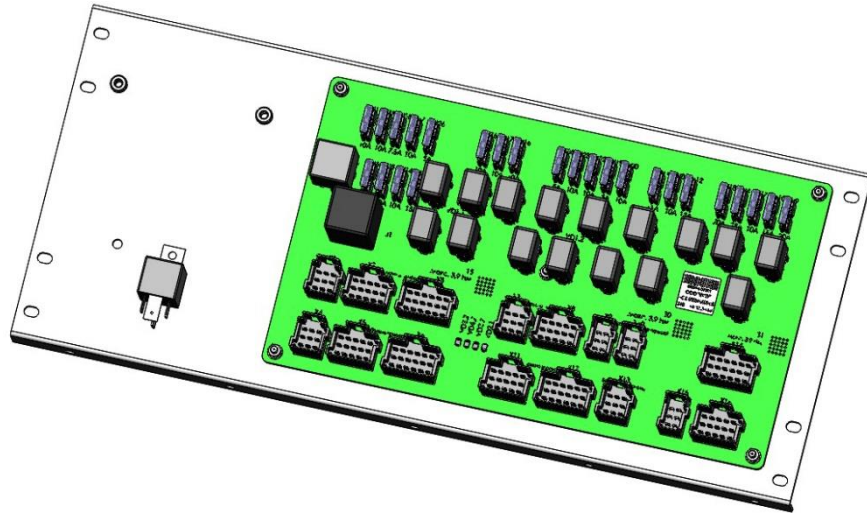

# Pavlovsky Bus

## Description

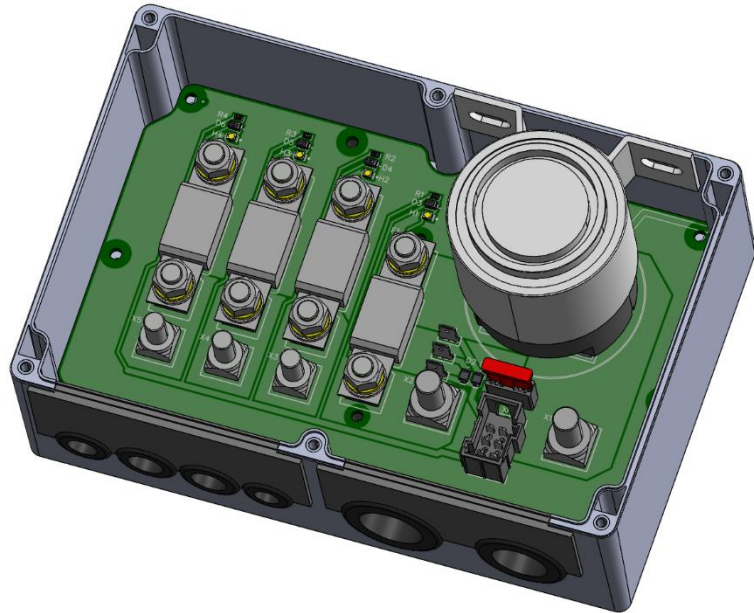

- application : 4 typ of busses
- qty: up to 6000 per year
- project: 000045
- status: development

## Features

- using innovative Press-fit technology
- compactness
- increased vibration resistance
- power distribution module
- total current more than 200 A
- faster assembly on the conveyor
- elimination of errors during assembly

# Master Bus

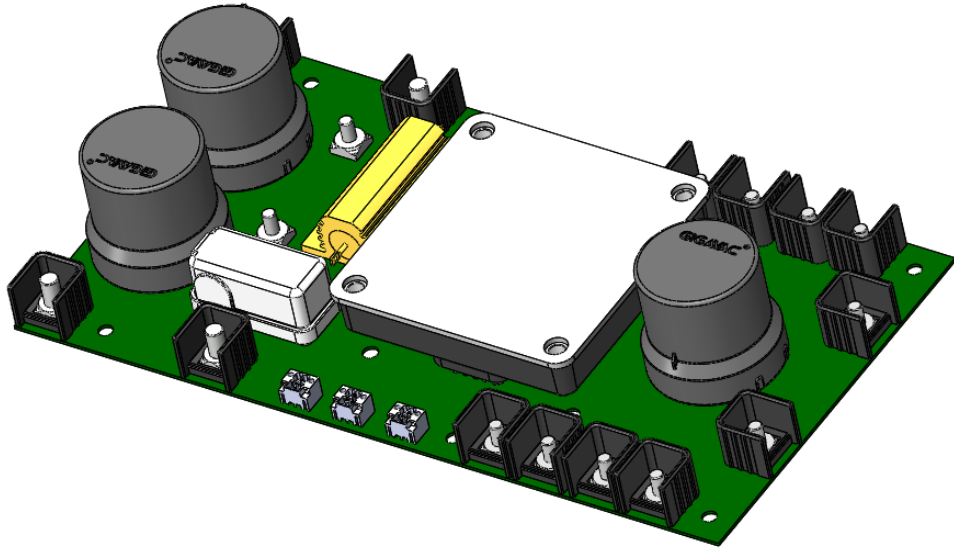

## Description

- application : bus
- qty: min 500 per year
- project: 000103
- status: development

## Features

- using innovative Press-fit technology
- compactness
- increased vibration resistance
- power distribution module
- total current more than 500 A
- faster assembly on the conveyor
- elimination of errors during assembly

## Description

- application : Electrobus
- qty: 800 per year
- project: 000072
- status: development

## Features

- using innovative Press-fit technology
- compactness
- increased vibration resistance
- power distribution module
- total current more than 500 A
- faster assembly on the conveyor
- elimination of errors during assembly

Thanks!
